

Andro Balance (60 tablets)

£24.90

Andro Balance combines botanical extracts and nutrients reported to exhibit anti-androgen and antioxidant properties.

For Her ~ The ingredients provided in this product may be helpful for women experiencing symptoms related to Polycystic Ovary Syndrome (PCOS). PCOS is a complex medical condition often involving elevated levels of androgens, acne, hirsutism (excess hair), and menstrual abnormalities.

Andro Balance supplies saw palmetto together with stinging nettle root, Pygeum bark, and protective antioxidants. Although saw palmetto can be helpful when used alone, the other botanical extracts may expand the overall benefits in different ways. Using these ingredients in combination provides a more complete spectrum of nutritional benefit.

For Him ~ Alterations in male hormone metabolism can play a significant role in the development of enlargement of the prostate (BPH). Several nutritional factors have been demonstrated in sound scientific studies that help alleviate the symptoms of BPH. The selected nutrients and botanical extracts in Andro Balance work together to help support normal prostate function and health.

Together, these ingredients may help improve balance of dihydrotestosterone (DHT), prolactin and bio-available androgens. Antioxidant action provided by lycopene, a tomato-derived carotene antioxidant and the trace minerals copper and selenium help support normal cell health and function.

Andro Balance is typically well-tolerated with mild, infrequent gastrointestinal distress as the only reported side effect.

Andro Balance is formulated to work effectively and safely with a daily multiple vitamin and mineral supplement to create a balanced and comprehensive nutritional program.

Suggested Use: 1 tablet twice daily with food.

Cautions and Contraindications: No adverse reactions or drug interactions have been reported.

This product was made in a GMP and ISO 9001:2000 registered facility.

Last updated: Sept 2009
