Immune Support (60 tablets)

£32.50

Immune Support provides active plant extracts that help enhance natural immunity and support DNA repair, a natural process that is crucial for protecting cells against the effects of environmental and metabolic stress. Cells and tissues are vulnerable to daily damage from chronic stress associated with lifestyle, environmental pollution, illness, medications, metabolic activity, and the aging process. The ability of the immune system to mount an appropriate and effective defence as well as repair damage that may occur is critical to staying healthy. The botanical extracts in Immune Support work together to support the immune system and cellular repair processes.

AC-11®: This unique water-soluble plant extract is obtained from the inner and outer bark of *Uncaria tomentosa*, commonly called Cat's Claw. It simultaneously enhances natural processes involved in the up-regulation of DNA repair and immune cell responsiveness. AC-11® differs from all other Cat's Claw products in that it is 100% water-soluble, and therefore 100% bio-available for absorption while passing through the gastrointestinal tract. Among its numerous actions, AC-11® turns off synthesis of certain inflammatory compounds, exerts antioxidant activity that improves resistance to DNA damage, and enhances natural DNA repair capacity. AC-11® has a high level of safety, as compounds that may contribute to gastrointestinal irritation or toxicity are removed while beneficial compounds called carboxy alkyl esters (or CAEs) are retained.

Larch arabinogalactan: Larch arabinogalactan (*Larix occidentalis*), commonly known as the larch tree, contains a natural polysaccharide (arabinogalactan) that stimulates beneficial immune cells (macrophages and natural killer cells) and cytokines (part of the body's natural defense system). Arabinogalactan enhances the immune system by blocking viruses and bacteria from attaching to cell membranes, stimulating natural killer cell activity, and increasing the number of immune cells, particularly macrophages, present in the blood system.

Arabinogalactan may also have important benefits for the colon as it may act as a prebiotic, a nutritional agent that supports the growth of beneficial bacteria including *Bifidobacterium* and *Lactobacillus*.

Immune Support is appropriate for individuals who wish to enhance immune system function, DNA repair, and overall energy levels thereby helping to counteract the damaging effects of chronic stress associated with environmental influences and aging.

Suggested Use: 1 tablet twice daily with food.

Cautions and Contraindications: No adverse reactions have been reported. Cat's Claw should not be consumed by anyone who has undergone a transplant, or by pregnant or breast feeding women.

This product was made in a GMP and ISO 9001:2000 registered facility.

Ordering Options:

By phone or in person at Maureen Gillanders Body & Skin Care Clinic, Fort Complex, L'Islet, Guernsey, GY2 4SN.

Online at www.bio-vitality.com (through Amazon).

Any cheques to be made payable to Maureen Gillanders (Guernsey) Limited.

Supplement Facts

Serving Size 1 Tablet

Amount Per Tablet

AC-11®** patented water-soluble extract of *Uncaria tomentosa*, min. 8% carboxy alkyl esters 250 mg*

Larch Arabinogalactan (*Larix occidentalis*), 750 mg* dried water-soluble extract

*Daily Value not established.

Other ingredients: Cellulose, stearic acid, carboxymethylcellulose sodium, silicon dioxide, magnesium stearate, and cellulose coating.

**AC-11® is a registered trademark of Optigenex.
