

Probiotic Support (90 vcaps)

£22.90

Probiotic Support is a probiotic supplement providing three different types of “friendly” bacteria that help support healthy gastrointestinal function. Stress, disease, improper nutrition, antibiotics, and medications may upset the delicate balance of microflora in the gastrointestinal tract. Supplementation with Probiotic Support can help restore a proper balance of beneficial microorganisms and support intestinal functions in numerous ways.

Three Probiotic Strains: Probiotic Support contains three compatible probiotic species that help regulate intestinal function, support proper digestion, and promote a favourable ratio of good to bad bacteria. *Lactobacillus acidophilus*, *Lactobacillus rhamnosus*, and *Bifidobacterium longum* work together to re-establish a healthy balance of lactic acid bacteria in the gastrointestinal system. These probiotic strains inhibit the adherence and multiplication of pathogenic microbes such as *Escherichia coli*, (the cause of “Montezuma’s Revenge”), *Staphylococcus aureus* and Salmonella (common causes of food poisoning), and *Candida albicans* (yeast infections), and other pathogens.

Acid-Stable Delivery System: Probiotics are living micro-organisms that need to be protected from heat, humidity, and stomach acid in order to provide beneficial effect. To help protect the fragile organisms from the harsh, acidic environment of the stomach, a vegetable fatty acid lipid layer is used to encase and protect the beneficial bacteria from destruction by stomach acid. This helps ensure that adequate amounts of live bacterium reach the small intestinal environment where they are needed.

Does Not Require Refrigeration: Typical probiotic formulations require refrigeration to preserve the viability of the micro-organisms. The special fatty acid coating used for Probiotic Support not only protects them from destruction by stomach acid, it also increases shelf-life at normal room temperature so that refrigeration is not necessary.

Probiotic Support is a good choice for individuals who wish to support a healthy balance of friendly intestinal flora with probiotic supplementation that does not require refrigeration.

Suggested Use: 1 to 3 capsules daily.

Cautions and Contraindications: No adverse reactions have been reported.

This product was made in a GMP and ISO 9001:2000 registered facility.

Last updated: Sept 2009

Supplement Facts

Serving Size 1 Capsule

Amount Per Capsule

Probiotic Blend	80 mg*
-----------------	--------

Supplying 3.0 billion viable microorganisms as *Lactobacillus acidophilus*, *Lactobacillus rhamnosus*, and *Bifidobacterium longum*

*Daily Value not established.

Other ingredients: Cellulose, Vcaps™ vegetarian capsule, vegetable lipids, maltodextrin, silicon dioxide, and L-leucine.
